PROFESSIONAL SUMMARY

Software Engineer with experience developing mobile and web applications using Flutter, Java, Python, Flask, and MySQL. Proven track record in designing and implementing software solutions, crafting user interfaces, developing backend services, and delivering end-to-end applications within Agile teams. Passionate about learning new technologies and building user-centric software. Seeking to contribute and grow professionally as a Software Engineer, Full Stack Developer, or Mobile Application Developer.

EDUCATION

CETYS University
Bachelor's Degree in Software Engineering

Graduated: June 2025

GPA 88.67/100

WORK EXPERIENCE

Sistemas y maquilados internacionales S.A de C.V

Tecate, Baja California, México

Software Engineering Intern

October 2024 - January 2025

- Designed and developed a web-based requisition management system using Flask, Bootstrap, and MySQL.
- Implemented request registration, approval workflows, and request history management.
- Collaborated with stakeholders to improve internal business processes.
- Participated in testing and debugging before deployment.

MAJOR PROJECTS

Magic Menu

May 2024 – June 2024

Mobile application that allows users to order food while watching a video of the preparation process of the selected item.

- Developed an Android application that allows users to browse menu items and watch preparation videos before placing an order.
- Designed an intuitive mobile interface to improve the ordering experience.
- Implemented backend functionality using Java.
- Collaborated within an Agile Scrum development team.

Santo Thomas

April 2025– June 2025

Mobile application for managing 5S audits, allowing companies to create and manage organizations, departments, and customized questionnaires.

- Developed a cross-platform mobile application using Flutter and Dart to streamline 5S audit management for organizations.
- Designed and implemented intuitive interfaces for managing organizations, departments, and customizable audit questionnaires.
- Integrated the application with a MySQL backend to support data storage and retrieval.
- Collaborated with a multidisciplinary team following Agile Scrum practices and Git-based version control.

Web Requisition System

September 2024–
January 2025

Web-based requisition system to register requests and view user request history.

- Developed a full-stack web application for managing purchase requisitions using Flask, Bootstrap, and MySQL.
- Built responsive user interfaces to simplify request creation and tracking.
- Implemented backend functionality, including CRUD operations and approval workflows.
- Designed and managed a relational database to support efficient data management.

Engineering Expo Website

March 2023 – May
2023

Website developed for the Engineering Expo, allowing students and judges to view events during a project week.

- Collaborated in the development of a web platform for managing and displaying Engineering Expo events.
- Developed reusable React components to improve maintainability and consistency.
- Designed responsive user interfaces using Tailwind CSS.
- Integrated frontend components with a Django backend and MySQL database.

SKILLS

PROGRAMMING LANGUAGES

- JavaScript
- Python
- Java
- Dart

TOOLS

- Git
- GitHub
- Android Studio
- VS Code
- JUnit

FRONTEND

- Flutter
- React
- HTML5
- CSS3
- Bootstrap
- Tailwind CSS

TRAINING AND WORKSHOPS

Insulet — February 2025

- Introduction to Java fundamentals and basic object-oriented programming concepts.
- Development of practical exercises and hands-on activities during the training.

Coursera — October 2024

- Creating Dashboards and Storytelling with Tableau .

BACKEND

- Flask
- REST APIs
- Node.js

DATABASES

- MySQL
- MongoDB (Basic)

LANGUAGES

- Spanish — Native
- English — B2
